Work Experience

SDE Intern at AnantKaal, Remote   June 2024 – January 2025

- Worked with different clients during the internship.
- For Cybernous Infosec Pvt Ltd, built a web application:
  - Developed a learning platform where users can learn and track progress with a custom reward-based eLearning system.
  - Implemented Firebase functions for the payment system.
- For Travio, developed a travel booking platform:
  - **Frontend:** Developed with Next.js, handled state management for different users, efficiently managed user workflows, and integrated an ML-based chatbot for user queries.
  - **Backend:** Developed with Django, implementing the authentication system using JWT and OAuth.

Projects

Pramaan Chain (Web3 based Evidence Management System)

- Developed Pramaan-Chain, a blockchain-based evidence management system with secure multi-account functionality and data integrity.
- Built CLI tools for blockchain interaction, enabling user authentication and secure evidence storage.

Technical Skills and Interests

- **Languages:** e.g. Golang, JavaScript, TypeScript, Python, C++
- **Technologies:** e.g. HTML, CSS, AWS (EC2, S3, Lambda), Cloudflare, Azure
- **Frameworks & Libraries:** e.g. Node.js, Golang Gin, Django, FastAPI, React.js, Next.js
